Indo Exports

What We Offer

Our jatropha products are produced under suitable environmental conditions. Jatropha seeds grows on a wide range of climates and soils. This shrub or small tree 3-5 mts in height can be established on degraded, gravelly, sandy or loamy soil. Apart from manufacturing jatropha products, we also provide consultancy for jatropha cultivation and biodiesel production. Some of our products and services are mentioned below:

Jatropha Curcas Seeds

We procure superior quality Jatropha Curcas Seeds that are largely used in oil extraction process. These seeds yield large amount of oil using engine driven expeller. The non-edible oil from these seeds can be used for making soap and has pharmaceutical uses.

[Send Online Query](#)

Jatropha Seedlings

We also supply quality Jatropha seedlings, which is adapted to a wide range of climates and soils. These can grow almost on any type of soil whether gravelly, sandy or saline and thrives even on the poorest stony soils and rock crevices. It is a drought resistant perennial, living up to 50 years.

[Send Online Query](#)

Jatropha Germinated Seeds

These seeds supplied by us can be used to extract oil as well as for cultivation purposes.

Through these seeds can be grown that grows up to a height of 3 meters, which means harvesting is an easy task. The seeds are crushed to extract raw oil, a process that also provides organic fertilizer from the husks. Our Jatropha seeds contain about 35% of non-edible oil.

Moringa Seeds

We supply moringa seeds on large scale that are used for agricultural and various industrial purposes.

These seeds are graded and separated by skilled manpower to ensure that we offer quality seeds.

Profile

Our Essence

Grounded on high quality control and skilled workmen, we are one of the pioneers in this industry to introduce world-class Jatropha products and service. At Agni Net, we have undertaken Non-Conventional Energy projects on turnkey basis and are also enlisted as an ESCO (Energy Sourcing Consultancy Organization) in UNDP/GEF under Ministry of Steel, Govt. Of India to carry out these projects.

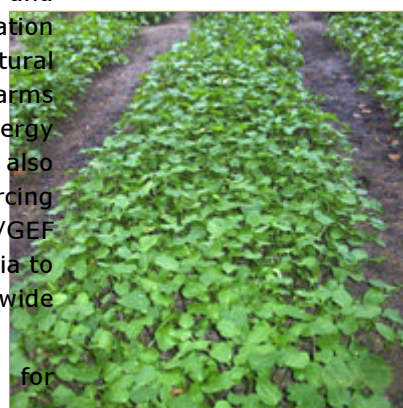

We Offer

We are proud of being worldwide promoter of Jatropha & has developed the techniques for profitable production of Jatropha plants. We associate ourselves from concept to commercialization of viable Jatropha projects by providing total support and by attending world-class services.

Agronomical Assistance

As an open community resource for organic production, we assist farmers who are engaged in the cultivation of Jatropha. We conduct workshops and offer materials like seeds, bio-fertilisers & other materials. In collaboration with other agencies and organizations, we provide access to information and services that promote conservation and/or ecologically sound agricultural practices on a diversity of farms (undertake Non-Conventional Energy projects on turnkey basis and are also enlisted as an ESCO (Energy Sourcing Consultancy Organization) in UNDP/GEF under Ministry of Steel, Govt. Of India to carry out these projects). The wide range of services to farmers include:

- Selection of quality seeds for germination
- Techniques for land preparation
- Plantation Techniques from the day of transplantation
- Plant Care Techniques
- Irrigation Techniques
- rainwater harvesting
- Inter-cropping Techniques
- Methods of seed collection
- Oil Extraction Techniques
- Collection of Bio-residues for Biomass gasification
- Sericulture Development
- Bee hiving techniques
- Briquetting of oil cake for value

About Us

located in Pondicherry, We are one of the leading manufacturers of **Bio-Fuel**. **Agni Net Bio Fuels [P] Ltd (ANBFPL)** is a pioneer in production of **Eco-friendly & 100% pollution free, pure & natural Bio-Fuel** in alternative to fossil fuel which is in great demand that the nation of the

addition

world are craving for and have the technology for replacement of **Coal and Furnace oil.**

Financial Assistance

Having entered into a Memorandum of Understanding (MOU) with State Bank Of Mysore, we provide financial assistance to small, medium & big farmers cultivating Jatropha by entering in to tripartite agreement with farmers & Bank. We arrange loans from the Nationalized Banks of India to farmers as per the norms & conditions of NABARD in terms of farm credit for agricultural inputs. We provide financial assistance for purchasing of seeds, insecticides, pesticides & other materials required for the cultivation of top quality Jatropha at competitive pricing.

Dedicated to change the life standard of rural farmers and having wide agronomic experience in Jatropha plantation, We are the only company to provide agronomic techniques right from seedlings in the finished products under one roof. With this, we also provide big/small loans to the farmers on tie-up with Nationalized Banks for the cultivation of Jatropha which has been coined by the term **"Black Gold" or "Green Gold"** of our country by eminent scientists and researchers.

Send Your Enquiry

Buy-Back of Jatropha Seeds

By entering in to tripartite agreement with farmers & Bank, we assure the buy-back of farm produce. The seed we buy back, is a guaranteed product in terms of quality, productivity & properties. To maintain the same, we provide various assistance & aids to the farmers & cultivators engaged in this field. Operating world wide, we buy-back standard quantity of products at fixed & competitive pricing ensuring rewards to the farmers & a safety zone of their sheer hard-work. It empowers us to deliver top quality products.

Strong Tie-Ups with Best Manufacturers

We have strong & effective tie-ups with some of the leading industries to replace fossil fuels with bio fuels. To uphold this, we offer expert technical & financial assistance to the Jatropha cultivators to use best quality seeds & advanced technology inspected under the strict vigilance of experienced quality control managers. This ensures quality & quantity of Jatropha seeds with high oil content.

Send Your Enquiry

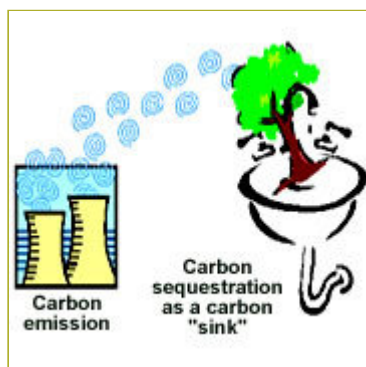

Bio Fuel

We are one of the few counted names in Indian agricultural industry, to offer Bio fuel. Simple to use, biodegradable nontoxic in nature and essentially free of carbon, sulfur and aromatics; it is a clean burning alternative fuel produced from domestic, renewable resources. The use of Bio-fuel in a conventional Jatropha seeds with high oil content.

substantial reduction of unburned hydrocarbons, carbon monoxide and particulate matter compared to emissions from fossil fuel. In addition, the exhaust emissions of sulfur oxides and sulfates (major components of acid rain) from Bio-fuel are essentially eliminated compared to other fossil fuels.

[Send Your Enquiry](#)

Clean Development Mechanism (CDM)

The CDM enables developing countries like ours to carry out projects that reduce Green House Gases (GHG) emissions to receive credits for these reductions. These credits can be sold to developed country parties, which use them to offset their own emission reduction requirements. We, ANBFPL enable farmers and industries to receive such credits both on plantation as well as on finished products (bio-fuel) which reduce GHG emissions particularly CO₂.

[Send Your Enquiry](#)

Why Jatropha?

Jatropha Curcas (Ratanjyot) stands unique for its drought resistant, growing well in marginal/poor soil with minimal water and produce seeds for atleast 30 years. The produced seeds have 30-40% oil content and the oil is combustible without being refined.

Benefits of the Jatropha Oil:

- Being highly combustible, with high calorific value, its usage in place of furnace oil in industries, Jatropha Oil is highly economical option for the industrialists.
- The oil cake when briquetted with biomass has calorific value equivalent to that of coal.
- Jatropha is a medicinal plant for curing cancer, piles, pneumonia, ulcers, paralysis and rheumatism.
- Its use mitigates global warming and reduces green house gas emissions. This helps in acquiring Carbon credits(CDM) under Kyoto protocol convention.
- By transesterification, Jatropha oil is converted to Bio-diesel with glycerine as a by-product for soap industries.

Sound Infrastructural Base

Being a leading name in providing world-class service & products, we boast a strong infrastructure and produce bio fuel. At ANBFPL, all the products are stored in the well spaced storage unit and we have our own expeller units for oil extraction. Quality is maintained at each stage right from the plantation to the finished products by our Quality control department.

Geared with modern technology we are empowered with excellent team of experienced professionals to execute the prestigious projects entrusted to us, timely and qualitatively.

Clients

Over the course of years, we have become Indian agricultural sector's most reliable and economical source for quality products. Our commitment to quality, service and value has enabled us to achieve preferred supplier status with a wide variety of market leaders on national platform.
